Tension &x 42 / 02 / 2 - This constant depends on: 4> The unstretched (natural) (ength of the String or Spring(6) = >/1 = 3/2 - This is Wheet is called Hookes - Modulus of clasticity is often also reffered to as Usunas Modulus, especially in physics natural length (1) Property of the object extension (a) determined by Force and Modulus of Clasticity (1). Property of the material Force, often weight. external forces Hen
